

# ***Internal Risk Management--A Structured Approach***

***Presented By:***

***Debbie Tomsic  
Strategic Planning,  
Programming and Analysis  
Division***

***June 27, 2000***

# Agenda

- **Background**
- **Changing the Approach**
- **The Policy**
- **Implementing the Policy**

***Risk Planning***

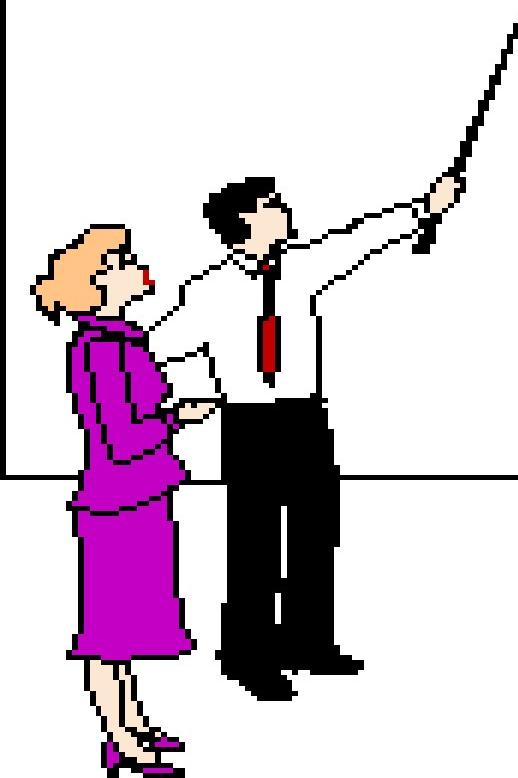

***Risk Assessment***

***Risk Handling***

***Risk Monitoring***

***Risk Documentation***

- **Closing/Questions**

# Many Assessment Tools

**ICS**

**MCAP**

**ASA**

*Customer Surveys*

**BOD**

**IOAs**

**MCRs**

**FMRS**

**MMRs**

**Performance Plan**

**SMRs**

**SRM**

**Surveillance Plans**

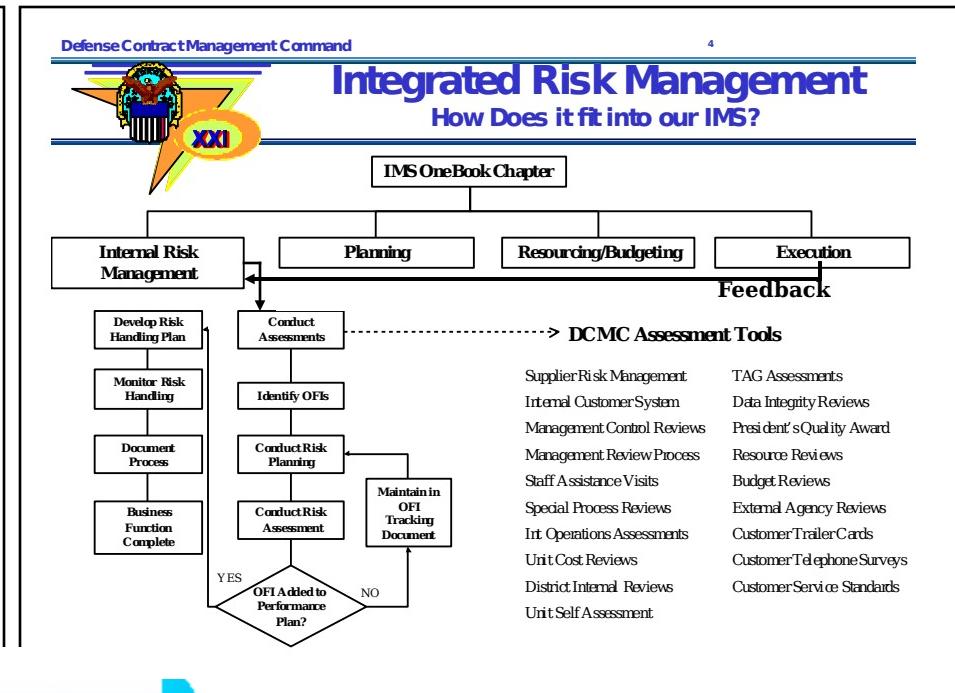

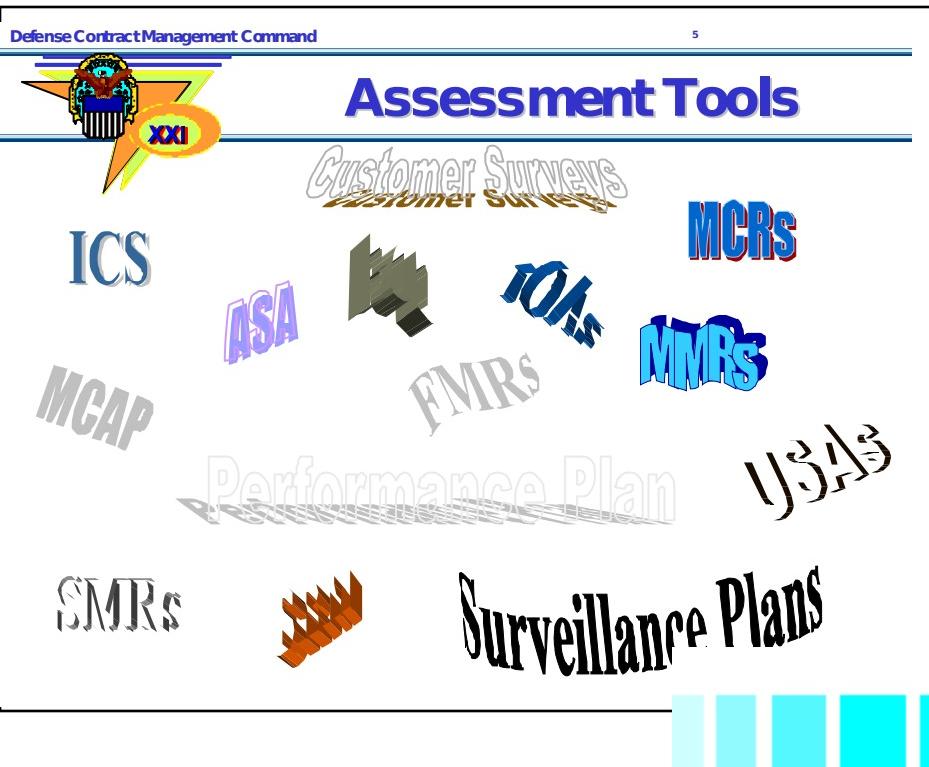

**USAS**

# Problems

- Event driven
- Individual “stovepipes”
- Little integration
- Don’t adequately assess risk
- Field inundated
- Duplication of effort
- Communication breakdowns
- Limited consolidation of gaps
- Miss “the forest for the trees”

# Changing the Approach

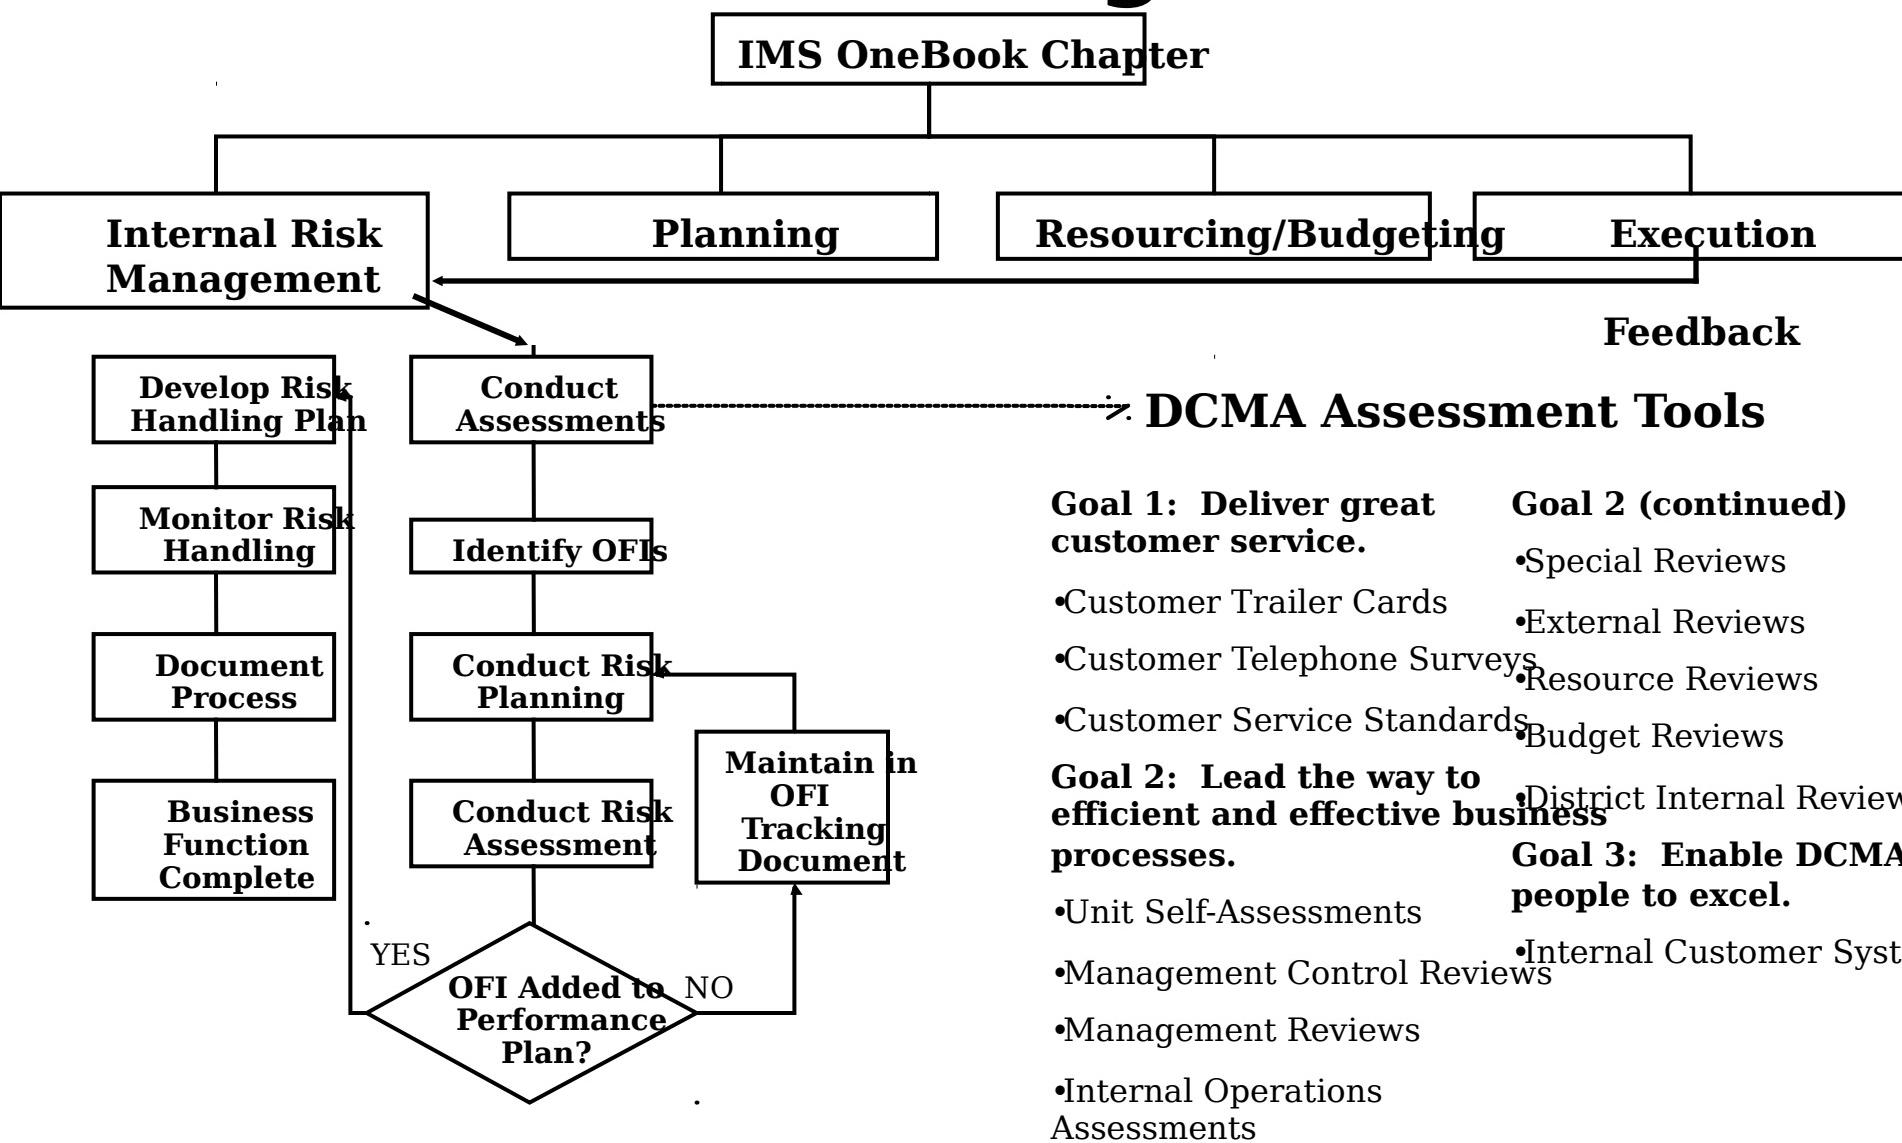

To transition from collection of “events”  
to an integrated management approach

Let's take a closer look

# Internal Risk Management

How Does it fit into our IMS?

# Why the Change?

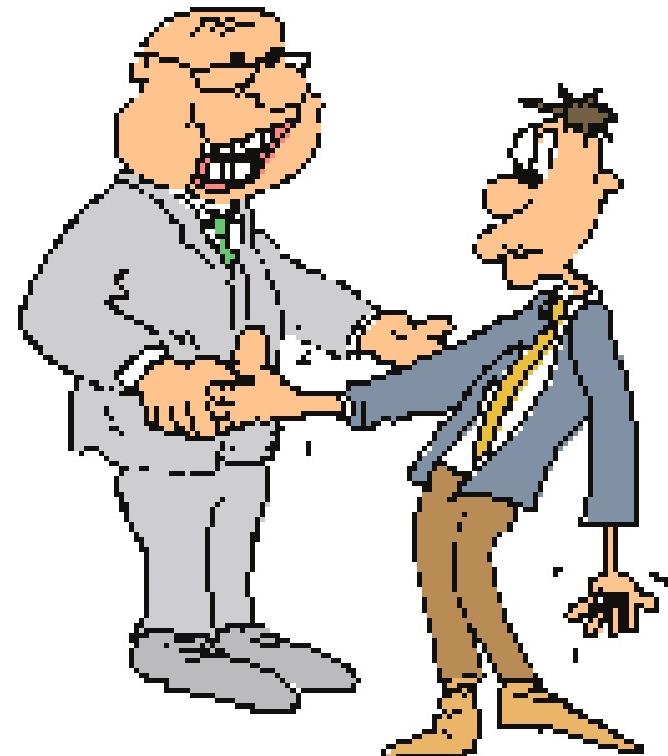

**To not only consider risk but to ...**

***Understand it,***

***Plan for it,***

***Resource to it, and***

***Act on it***

# The Policy

**Same Approach**

**One Book**

DLAD 5000.4, Contract Management

**0.1**

**Risk Management**

**Same Terminology**

**One Book**

DLAD 5000.4, Contract Management

**3.1**

**Supplier Risk Management**

**Risk Planning  
Risk Assessment  
Risk Handling  
Risk Monitoring  
Risk Documentation**

**One Book**

DLAD 5000.4, Contract Management

**12.1**

**Internal Risk Management**

**18 Process Chapters**

**12.1.x**

**Tool Subchapters**

**Just different inputs**

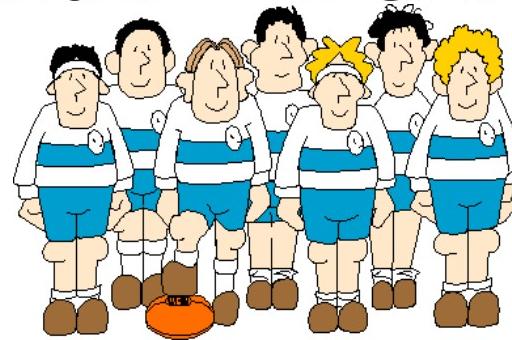

# Key Operating Precepts of our Integrated Approach

- Use the same risk management approach on ourselves that we use on the contractors we manage
- Improve information flow
- Structured integration
- Phased implementation
- Simplify CMO reporting requirements

# Policy Developed by a Team

- **Debbie Tomsic** DCMA HQ
- **Bob Kennedy** DCMA HQ
- **Chuck Crippen** DCMA Asmt Ctr
- **Dave Rugg** DCM Twin Cities
- **Susan Clark** DCM Atlanta
- **Karen Cleaves** DCMDE
- **Valerie Edwards** DCM Phoenix
- **Linda Haymaker** DCMDI
- **David Hoshaw** DCMDI

# The Intent

- **Integrate, integrate, integ**
- **Risk-based prioritization of opportunities for improvement (OFIs)**
- **Work prioritized OFIs into Performance Plans**
- **A more comprehensive and risk-based review of problem areas and an actionable plan to fix them**

# DCMA Uses the DoD Model

- **Review complete set of OFIs from all assessment activity to date**
- **Use management and planning tool (e.g., Affinity Diagram) to identify and understand interrelationships among OFIs**
- **Categorize like OFIs into logical, natural groups**

- Identify and analyze risk associated with OFIs/OFI groups
- Prioritize OFIs based on risk (risk of not taking corrective action in response to a known OFI)
- Risk Ratings:
  - High risk***
  - Moderate risk***
  - Low risk***
- Internal Risk Assessment Matrix provided as a guide

- **Based on risk ratings, determine “critical, top priority” OFIs/OFI groups**
- **Develop improvement strategies for all critical, top priority OFIs**
  - Modify current year's Performance Plan as required or*
  - Add to next year's Plan (during regular planning/budgeting cycle)*
- **Use root cause analysis or other management and planning tool**

- **What has not changed** ... CMOs must develop supplemental strategies for applicable performance and investment goals
- **What has changed** ... guidance on adding OFIs changed to comply with new Internal Risk Management policy
- Things to remember:
  - Tie strategies to existing performance and investment goals***
  - Use strategy boxes provided in Plan***
  - Identify “who” for implementing strategy--link to team level***
- More information on Page C-4 of Performance Plan  
**This is YOUR tool - not a District or HQ sledgehammer**

# Good Strategies ...

- **Attack areas of greatest organizational risk**
- Tie to DCMA goals
- Address root causes and not just symptoms
- Have discrete actions
- Clearly identify “who” and “when”
- Have milestones
- Are measurable
- Are communicated to workforce
- Lead to better performance and customer satisfaction

- **Via Management Review Process**
- **Track achievement of strategies in Performance Plan**
- **Evaluate impact achievement of strategies has on risk level**
- **Change strategies to match changes in risk ratings or employ new strategies if current ones are ineffective**

- Document results of previous four steps
- Use central repository (tracking document) for all OFIs
- Managed by one person--usually IMS focal point
- Command plans to automate in the future--DIRAMS module under development

# Closing

- **Introduced at Commander's Conference (Nov 99)**
- **Published One Book chapter (Mar 00)**
- **Briefed at Group Leaders' Conference (Mar 00)**
- **Trained at Business Plan Workshop (Apr 00)**
- **Implementing during FY 01 Business Plan cycle**
- **Developing automated tracking tool**
- **Exploring other training options, e.g., satellite broadcasts**
- **Changes to assessment tool sub-chapters on the horizon**
- **More integration of assessment activity expected in the future  
(investment goal in FY 01 Performance Plan)**

# Questions?
